

BREF programme for 2020 and beyond

EC Joint Research Centre has issued an updated programme for both New and Reviews of existing BREFs under the IPPC Directive and IED 2010/75, for work planned over the next couple of years.

New

Waste Gas Chemical – WGC. Final version published for comment, expected to be accepted in early 2020.

Textiles- TXT. Although not of direct interest to members, this is awaiting its final issue in early 2020

Reviews

Large Volume Inorganic Chemicals – LVIC. First issued 2007 and review is planned over 2020/2021.

Some others which are not necessarily key sealing issues

Ferrous Metals Processing – FMP. First issued 2001. Review documents issued for comments.

Surface Treatment of Metals – STM. First issued 2006, and due for review 2020/2021

Ceramic Manufacturing Industry – CER. First issued 2007. Review process has started.

Smithy and Foundry industry – SF. First issued 2005. Review process has started.

Slaughterhouse and Animal By-products – SA. First issued 2005. Review process has started and meeting report issued September 2019.
